

TERMINAL INSPECTION

- 1. Low Pest Risk, Low Level Inspection:** When from a commercial shipper and not in violation of a quarantine, minimum inspection required of the following to determine if material is free from pests, properly labeled as to contents and for validity of certification:

- All California origin material
- Bulbs, corms, tubers, pips, stolons, rhizomes
- Seeds in small packages
- Fruit trees
- Strawberry plants
- Cactus
- Venus fly trap
- Onion sets
- Rhubarb
- Plants produced epiphytically
- Resurrection plants
- Terrarium plants
- Boxwood
- Ivy
- Carnations
- Evergreen seedlings
- Horseradish plants
- Juniper
- Pansies

- 2. High Pest Risk:** Past records indicate that serious pests may be carried on plant material listed below, careful 100% inspection should be made of all plants on this list:

- All plants shipped by a private party
- All plants of foreign origin
- All plants not listed under (1) above depending on origin
- Cut flowers/greens from Hawaii and Florida
- Berry bushes
- Zoysia grass* plugs (live insects)
- Palms (scale insects)
- Banana tree
- Euonymus* (snails)
